Break-even

Break-even = the sales where campaign profit = 0
= campaign spend ÷ (gross profit ÷ sales)
= ฿565,000 ÷ (฿1,974,109 ÷ ฿3,000,000)
= ฿565,000 ÷ 0.6580
= ฿858,615 → 28.6% of the target ฿3,000,000

Sell at least ฿858,615 (28.6% of target) so gross profit pays the campaign spend ฿565,000
Every ฿100 sold leaves ฿65.80 after product cost — to pay the campaign spend
